as BIPOC

469 youth selected white only

In the last year, have you stayed in a shelter, somewhere not intended as a place to live, or someone else's home because you had no other place to stay?

904 responses

94 youth were homeless with a parent or adult family member

6 youth were homeless on their own

63% of those homeless youth are BIPOC

According to the Homeless Management Information System... 5,913 youth under the age of 18 stayed in shelters or temporary housing programs. (or, almost 1% MN youth.) 1 in 262 Minnesotans experienced homelessness in 2019. Using those statistics, we would expect 3 or 4 youth out of 904 responses.

Narrative Questions

We will narrow these down by common themes and share some direct quotes in our final report.

- Now think about your family and friends. Do they have everything they need? Are you worried about any needs that are not being met? How could the community help your family/friends?
- Tell us more about your school experience. What is helpful? What could be better? (skip this section if you are not in school)
- Do you need us to connect you or your family to resources or supports at your school or in the community? What do you need?
- We just started an online youth group called Moodie Mondays. What do you think kids your age would like to do at our online Moodie Monday events? (Describe activities, games, trainings, give-aways etc.)
- Do you have any final questions or comments for us?

“NO youth will be returning to school unfazed. If 100% of your kids are affected by something, you don't need an expert; you've got to become the expert.”

David Johnson, Co-Director of the Post Traumatic Stress Center
and associate clinical professor at Yale University School of Medicine; department of psychiatry.)
